

Dear Mrs. Fok,

I am writing to let you know that we had such a wonderful day today. Even the day is nearly coming to an end now, our hearts are still filled with the excitement and fun of Ocean Park. It was really a very successful activity, and so well organized. We did enjoy a lot! "Patient's Name" was laughing all the time!

Everything went so well and it was much much better than we had expected. All our previous concerns were gone with so many caring people surrounding us, from beginning to end. Everything was perfect! We felt so happy that we made this step out today. It has given us a lot of confidence for future outings.

We are so touched by your holy spirit of sacrificing yourself to help so many other families. We do admire you for extending your love of your own kid and family to a greater love of so many other kids and families. What you are doing is extremely meaningful that you are not only raising awareness of these rare diseases, but also put it into action in actually helping the families.

Thank you again -- for the help, the support, the care, the encouragement, and a perfect day! We can see that you were so busy taking care of everyone, and we hope you will have a chance to take some good rest for yourself.

*Take care,
Laura
